

## Important Reminders and Precautions

Dear User,

Thank you for choosing **koralDose 4H**! Please carefully read the following precautions before use to ensure proper operation of the device:

**koralDose 4H must be connected via the koralCore App to function properly.**

If the device cannot connect, please try the following methods:

- Turn off and restart your phone's **Bluetooth**, then try connecting again.
- Restart both your **phone and the device**, then attempt to connect.
- Ensure the **app is correctly installed** and that the **device is registered and calibrated** properly.
- You can search for "**REEFB**" on **Google Play** or the **App Store** to download the koralCore App.

### **Mechanical noise during operation**

koralDose utilizes a **6-gear transmission system**, which converts high speed into low speed while providing high torque. As a result, some mechanical noise is expected during operation. Due to manufacturing tolerances, **each pump head may produce slightly different noise levels and speeds**, which is normal and does not affect functionality.

### **Eco-friendly, uncoated exterior**

To avoid unnecessary chemical coatings and align with our commitment to sustainability, koralDose features an **environmentally friendly, uncoated exterior**. As a result, **slight color variations may occur**, which is a normal phenomenon and does not affect the device's performance.

### **Calibration is required before use**

Uncalibrated pump heads **cannot execute scheduled dosing**. Please ensure proper calibration before use to guarantee **accurate dosing and proper device operation**.

### **For indoor use only**

Do not place the device in **humid or outdoor environments**. koralDose is suitable for common **aquarium additives**, such as **calcium, magnesium, and carbonates**, but **avoid using overly viscous or particulate-containing liquids**, as they may affect performance.

**For detailed koralDose 4H instructions**, please visit [www.reefb.com/support/](http://www.reefb.com/support/) to download the manual or watch instructional videos on YouTube.

For any product-related inquiries, feel free to contact our support team at **support@reefb.com**.

Thank you for your support and understanding. We hope you enjoy using koralDose!
